# Objectives

- Technical: Learning ruby/ rails
- Personal: Structuring a bigger project.
- Making choices is difficult

# Initials plans

- 2 players card game.
- Players move cards over the field.
- Exact rules to be determined.
- Make a setup that is scalable.

# Evolution of the plans

- Minimum vertical slice achieved.
- Did not meet sprint goals.
- Learning vs meeting goals.

# Architecture

Ruby, Ruby, Ruby. More specifically, ruby on rails.

- Model: plain ruby
- View: erb-files and css
- Control: ruby, heavy rails dependency.
- Channels, for web-sockets.

# Architecture, some specifics

- No-db (rails, please)
- gems: mini-test
- gem: turbo-frames/streams
- gem: pry (in the later stages)

# Take-aways

- Working with and around a framework.
- Minimum viable product for stack.
- Distinction between theoretical vs practical knowledge.
